

LAKE HAMILTON AND HOT SPRINGS ANIMAL HOSPITAL

PRE-ANESTHETIC BLOOD SCREEN

To minimize problems, we highly recommend that your pet be screened before any anesthetic procedures. Occasional problems with your pet can occur due to pre-existing conditions not evident during routine histories and physical exams. We believe these tests will greatly reduce the risk of complications both during and after anesthetic procedures.

Yes, I accept the pre-anesthetic bloodwork:

No, I decline the pre-anesthetic bloodwork:
